DETAILED ACTION

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by EP 173,829. EP 173,829 teaches (Fig.2) that one end (16) of a cable carrier chain is hinged such that it “is capable of swinging ...in a vertical direction approximately perpendicular” to the moving direction of the chain. With regard to claim 4, the member 16 is considered to be a first connection member and the pin (not numbered) is considered to axially support the connection member and serves as a fixation member.

2. Claims 2-5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to David B. JONES whose telephone number is (571) 272-4518.
